

MEETING MINUTES SUMMARY

ESI GEN IRC

12 November 2020

Meeting Overview

- Meeting held via Teams Video Conference
- UEP Zero Enrolment Units and Qualifications
- ITAB Update
- Meeting Outcomes

UEG Zero Enrolment Units and Qualifications

- AIS raised the recent directive received from the Department regarding the deletion of units and qualifications that have had zero enrolments for the past four years
- IRC members were asked to review the list of UEP qualifications and units and to advise of their confirmed deletion or provide rationale for them to be retained
- The IRC agreed that the Diploma of ESI Generation Maintenance and Diploma of ESI Generation Maintenance - Electrical Electronic and 20 units of competency are no longer fit for purpose.

ITAB Update

- The ITAB group advised that their representative from ISACNT on the ESI GEN IRC will continue their role

Meeting Outcomes

- The IRC agreed to delete two Qualifications and 20 Units of Competency with zero enrolments
- The IRC decided more information was needed. As there is expected growth and changes in the renewables arena, the rest of the zero enrolments were flagged for further investigation.
- The ITAB representative from ISACNT will remain.

Next IRC meeting scheduled for 18 February via Video Conference
