

I CONTROL WHERE MY TRAINING TAKES ME

Jordan Higgins
Track Maintainer and Inspector

Coming from a family that has been part of the rail industry for more than 50 years, it was not the first stop in Jordan's learning journey. Earning his chops first as a qualified butcher, he always felt that his calling and his passion lay in the rail industry and it also gave him an opportunity to learn something that was already in the lifeblood of his family.

Jordan began his learning journey with a focus on reskilling for the future and the potential to learn more relevant competencies that will aid him in being a contributing factor to the rail industry. His drive to learn and to be a team player has seen him take on more operational roles now.

"Working as part of a team, helping and supporting each other bonds us together - I love working with my mates all day".

Jordan started his career in the rail industry with just his Driver's License (P Plates), from there they trained him up and kept him interested. He now has his Certificate III in Rail Infrastructure and works in Track Maintenance.

Jordan's advice for anyone wanting to start a career in the rail industry is to have high communications skills and be able to work well in a small group.

"Make sure rail is your passion and always focus on how you can contribute to the success of your team."
