# TLI MATERIEL & DEPLOYMENT LOGISTICS PROJECT

Case for Change

Name of allocated IRC: Transport and Logistics IRC  
Name of the SSO: Australian Industry Standards Limited

## 1. Administrative information

*For a list of the products proposed to be reviewed as part of this project, please see Attachment A.*

Name of IRC:	Transport and Logistics IRC
--------------	-----------------------------

Name of SSO:	Australian Industry Standards Limited
--------------	---------------------------------------

### 1.1 Name and code of Training Package(s) examined to determine change is required

TLI Transport and Logistics Training Package

## 2. The Case for Change

*For information on the job roles to be supported through the proposed qualifications updates, enrolments data, completion rates, and the number of RTOs delivering these qualifications please see Attachment B.*

### 2.1 Rationale for change

Material and deployment logistics are critical roles in the Defence sector to ensure safe and efficient management of material and Defence personnel during logistics operations. The industry is experiencing changes that require skills development to address new technologies and work practices and ensure safety of Defence personnel.

The IRC is proposing to review Certificate IV, Diploma and Advanced Diploma in Materiel Logistics; Diploma and Advanced Diploma of Deployment Logistics, and associated units to ensure the skills and knowledge requirements contained in the qualification address changes in technology and Defence processes.

The IRC will investigate whether these qualifications can be amalgamated to facilitate a more aligned career pathway for Defence and integrated logistics support personnel, enhancing workforce mobility across the sector.

If this review is not completed, the qualifications will not be aligned with current Defence industry logistical processes and required safety requirements for Material and Deployment logistics staff. This will also be a barrier to barrier to Defence workers transitioning to civilian roles supporting Defence projects.

### 2.2 Evidence for change

The T&L IRC conducted industry research, held discussions with Defence personnel during the recent Logistics and Warehousing project and conducted an industry consultation webinar. The IRC identified that the impending merging of Materiel Logistics with traditional Logistics and Warehousing qualifications would leave knowledge and procedural skill gaps for the Defence sector.

The Certificate IV in Materiel Logistics, Diploma of Materiel/Deployment Logistics, Advanced Diploma of Deployment/Materiel Logistics and associated units of competency enrolments details are not known as the Defence sector is AVETMISS exempt. The Defence sector report a need for these qualifications and have requested they be updated to reflect current Defence requirements.

### 2.3 Consideration of existing products

Existing Units of Competency will be reviewed to align with current Material and Deployment practices and methodologies. Imported superseded units will also be updated.

Given the specialist nature and secrecy of Defence Material and Deployment logistics, there are no suitable training products in other packages.

The existing Training Package products for these qualifications are contained in the TLI Transport and Logistics Training Package and the existing Units of Competency are proposed to be updated to incorporate new technologies operations processes used by Defence.

### 2.4 Approach to streamlining and rationalisation of the training products being reviewed

Given the specialised nature of the Defence sector, qualifications need to be to be specific to its occupational needs. Therefore, this project will look to streamline Materiel and Deployment Logistics qualifications and will rationalise superfluous TLI associated units of competency, which will be deleted where possible.

## 3. Stakeholder consultation

### 3.1 Stakeholder consultation undertaken in the development of Case for Change

*For a full list of industry-specific stakeholders that actively participated in the stakeholder consultation process undertaken to develop the Case for Change, please see Attachment C.*

The initial request for this revision was from Defence personnel who are represented on the Transport & Logistics IRC and participated in the recent Logistics and Warehousing Supply Chain Certificate I & IV review project.

The work was outlined during a webinar which included over 70 representatives from all States/Territories and regional areas of those jurisdictions. Feedback on the proposed work was invited during the webinar.

The work was posted in the Engagement Hub of the AIS website and feedback invited from over 2000 registered stakeholders.

Notification of the opportunity to provide feedback through the Transport and Logistics webinar, or in writing through the Engagement Hub, was provided to transport and logistics sector stakeholder subscribers.

Development of the Case for Change involved consultation with stakeholders via the following communication mechanisms:

- Stakeholder webinars
- Face to Face meetings (Virtual)
- AIS Website
- Stakeholder networks
- Teleconferences
- Emails

Defence operates across all states and territories in Australia. Personnel from these states and territories have been included in the consultation and the above methods provide various options for those in rural and remote areas to contribute.

### 3.2 Evidence of Industry Support

*For a list of the issues raised by stakeholders during consultation and the IRC's response to these, please see Attachment D.*

No objections to the review of the qualification and units were raised during the consultation process. The proposed TLI qualification review and possible amalgamation is supported by the Defence industry and is supported by Transport & Logistics IRC.

Additional feedback on the need to review the Qualifications and Units of Competency has been provided by previous Defence staff working on the Supply Chain project as Technical Advisory Committee members.

Please see Attachment D.

### 3.3 Proposed stakeholder consultation strategy for project

*Note: For a full list of industry-specific stakeholders who are planned to be contacted to participate in the stakeholder consultation process undertaken for this project, please see Attachment E.*

Key Defence industry stakeholders will be identified in consultation with industry and the Transport & Logistics IRC. A general invitation to participate on the project Technical Advisory Committee (TAC) will be sent to all Transport and Logistics and Defence subscribers. Targeted invitations will also be sent to known technical experts.

AIS, on behalf of the Transport & Logistics IRC, will promote the opportunity to contribute through stakeholder webinars, the AIS website, EDM's, AIS newsletter and public notifications. Defence stakeholders will also be notified of key milestones throughout the life of the project, including requests for feedback on draft materials.

Stakeholder engagement and consultation will occur over the life of the project via a combination of the following methods:

- Direct engagement: Face to face consultations, Site visits, Phone, emails, video/teleconferencing
- Industry forums and conferences
- Webinars
- Online feedback mechanisms
- STA direct engagement

Given the size of Australia and that all Defence stakeholders are not centrally located in major cities, a range of consultation strategies will be used so stakeholders in rural, regional and remote areas, and in smaller jurisdictions have multiple avenues to provide feedback.

This includes but is not limited to, online/video consultation, email correspondence and promotional activity via targeted communications including social media. A recently developed Engagement hub on the AIS website provides a one stop portal for information about how all stakeholders can participate and inform Training Package development work.

## 4. Licencing or regulatory linkages

There are no licencing requirements contained in these qualifications. However, the qualifications address the skills and knowledge requirements to meet Defence requirements.

## 5. Project implementation

### 5.1 Prioritisation category

It is proposed that this review be progressed as a complex project.

In line with the AISC Prioritisation Report and to coordinate the release of updated products, the IRC recommends a complex update and implementation of this project.

### 5.2 Project milestones

- Key project milestones include:
  - AISC project approval – June 2021
  - Draft 1 consultation – March/April 2021
  - Stakeholder validation – June 2022
  - Quality Assurance – July/August 2022
  - Final consultation with states and territories – October 2022
  - CfE submitted for approval – 31 December 2022.

### 5.3 Delivery or implementation issues

No delivery or implementation issues have been identified to date. Potential implementation issues raised by Defence stakeholders and how these issues will be considered as part of the review, include training and assessment in the COVID environment; the key concern currently is the restricted access because of COVID protocols. This limits the exposure to training scenarios that are essential to maintain Defence skills in critical decision making and problem-solving situations. Information for other implementation issues will be included in the CVIG.

## 6. Implementing the Skills Minister’s Priority reforms for Training Packages (2015 and October 2020)

The project submission will support Defence expectations for training delivery and provide a revised Companion Volume Implementation Guide (CVIG) to support delivery of the revised products.

The qualifications will be reviewed to ensure they are aligned to roles related to Defence deployment and material logistic duties in Australia. The qualifications and associated Units of Competency are technical and relate to these specific roles. This review will also enable Defence specialists to move between deployment and material logistics positions.

These qualifications and associated Units of Competency are used in Defence contexts. The qualifications enable workforce mobility between state and commonwealth Defence sectors, as well as transition from Defence to civilian roles supporting Defence projects.

It is anticipated, there will be Skill Sets developed as part of this revision.

This Case for Change was agreed to by the Transport & Logistics IRC

## **Attachment C: List of stakeholders that actively participated in the consultation process of the Case for Change**

Active participation has included 41 stakeholders from the following organisations across all states and territories within Australia:

- Industry Reference Committee (IRC) Representatives
- Employers (Non-IRC)
- Peak Industry Bodies
- Unions
- Regulators
- RTOs
- Other/Consultants

### Attachment D: Issues Raised by Stakeholders during consultation on the development of the Case for Change

Stakeholder Type	Issues Raised	IRC's Response to Issues Raised
Industry Reference Committee (IRC) Representatives	Nil	N/A
Peak Industry Bodies	Nil	N/A
Employers (Non-IRC)	Nil	N/A
Regulators	Nil	N/A
Registered Training Organisations (RTOs)	Nil	N/A
Training Boards/Other	Nil	N/A
State and Territory Training Authorities (STAs)	Nil	N/A
Unions	Nil	N/A

## **Attachment E: List of stakeholders to be contacted as part of the development of the Case for Endorsement**

The Case for Endorsement development will involve contacting relevant stakeholders from the following organisations across all states and territories within Australia:

- Industry Reference Committee (IRC) Representatives
- Australian Defence College
- Employers (Non-IRC)
- Unions
- Regulators
- State Training Authorities
- RTOs
- Other/Consultants
