

PUA532022Y Diploma of Public Safety (Recovery Management)

Modification History

Release 1. This is the first release of this qualification in the Public Safety.

Qualification Description

The Diploma of Public Safety (Recovery Management) is designed for managers who lead the implementation of recovery at all levels. They chair meetings of recovery committees and functional groups.

They lead the development and maintenance of effective prevention, planning, preparedness and recovery strategies and programs by the provision of recovery management advice and support to strategic stakeholders and partners to support communities to recover from disasters and build community resilience

The role of recovery manager involves liaising with other organisations, providing relief and recovery services to disaster affected communities, providing psychological first aid, applying recovery concepts and principles, facilitating long term recovery planning for a disaster event, working within an emergency management context, coordinating recovery work across recovery environments, applying person centred approaches to recovery planning and activities and facilitating community involvement in recovery

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

No applicable.

Packaging Rules

A total of 12 **units of competency** comprising:

- **9 core units** listed below, plus
